Subject: Re: Dimock GW Site - Glycol/Alcohol Analysis

Unless I missed something, the Ethylene glycol is not on the list for Dimock. Since that is happening sooner, I think I should concentrate on the methoxyethanol tomorrow.

Subject: Dimock GW Site - Glycol/Alcohol Analysis

Jennie,

R5 and R6 have both offered assistance with the alcohols and glycols analysis. I spoke to Dennis Weslowski/R5 today and they are going to try their vacuum distillation unit for the ethylene glycol and see if that helps with the LC analysis.

They too were not seeing ethylene glycol when they were doing the surfactant analysis for the oil spill.

R5 will be contacting you on Monday. A conference call with R5 and R6 would be helpful so they know what type of support is needed.

I will be in Phila on Monday but can be reached on my cell.

Cindy
